

BIYOSAM

ABOUT US

Hello there. We hope to get to know you a bit better in the near future.
But first, let us introduce ourselves.

We are BiyoSam Organik – a small family company with dreams, convictions and values that we place at the core of our business. We believe that this is the best way to connect our roots with our future, just like we connect our local organic farmers with the colourful organic market.

Originating from Samsun – one of the most important hazelnut-producing regions in Turkey -, it was only natural that we use our local knowledge and expertise to bring this Black Sea speciality to customers across the seas and around the world. At the same time, we wanted to realise one of our dreams: contributing to a sustainable future for the region by acquiring only certified organic hazelnuts.

We are convinced that organic agriculture yields healthy, high-quality products that secure our planet and ourselves a long, bountiful life. It is our pleasure that in the course of the past dozen or so years, over 200 farmers have joined us in this conviction and braved the challenging switch to certified organic farming.

Dreams and convictions are good, but they cannot walk without feet. Our feet are the values that keep us grounded and upright. We take pride in the high quality of our products and our service. We also know that high quality can only be achieved through transparency, accountability and honesty. When you work with us, we inform you in full detail about our facilities, our logistics and your purchase – every step of the way. Because we feel that an honest company is the best companion for your path into the future.

BIYOSAM

OUR PRODUCTS

Coming from Samsun, Turkey, is reason enough to like hazelnuts. But we have better reasons too – reasons everyone can identify with.

Hazelnuts are astonishing when it comes to their nutritional value and their versatility. 100g of hazelnuts averagely contains around a quarter of the recommended daily amount of protein and dietary fibre while containing high amounts of mono-saturated fatty acids, such as oleic and linoleic acid, which simultaneously help lower bad cholesterol (LDL) and raise good cholesterol (HDL).

Apart from these excellent preventers of cardiovascular diseases, they also contain a series of vitamins which are essential to our body, such as 15mg of vitamin E (which is exactly the recommended daily amount), nearly a third of the recommended daily amount of folate, a vital vitamin B complex, high amounts of other vitamin B complexes and the vitamins A, C and K. As if that were not enough to ensure this powerful little nut's place among the most effective health agents, the hazelnut also parades high

BIYOSAM

OUR PRODUCTS

Although the list keeps going on, we think this morsel of information is tasty enough to awaken your interest – so we move on, in the tradition of the great storytellers of the Orient. And, to be honest, we all know that the value of health is, for lazy people like us, sometimes overridden by convenience. This is where the versatility of hazelnuts comes in.

Turkish cuisine has found innumerable ways to integrate hazelnuts into everyday dishes and we believe that others will be just as inventive. Think rocket salad with hazelnuts and figs. Or chicken breast, breaded with hazelnuts and sautéed in brandy and hazelnut liquor. Or simply remember the delight of chocolate-hazelnut spread for breakfast.

BIYOSAM

PRODUCT DETAILS

We try to cater for every possible use you might put our hazelnuts to with our certified organic processing factories: Be it size, moisture or packaging, your wish is our delight.

Natural Hazelnuts

Blanched Hazelnuts

Roasted Hazelnuts

SOCIAL RESPONSIBILITY

Our company is committed to obtaining Naturland and UTZ / Rainforest certificates and is going to have those certificates in a very short time.

All raw materials processed by us are purchased only from the farmers with a long-term contractual relationship.

Our contractual farmers are provided training support about organic agriculture and hazelnut farming and also financial support.

Our producers are producing organic hazelnut for almost 15 years and are small-scale family enterprises.
